An ounce of prevention is worth a pound of cure!

What is Health Screening?

Health screening is the key to improving people's health, productivity and controlling health care costs. Preventive medicine can lead to health risk reduction by helping people identify threats to their health and explain the process of a healthy change. Early disease detection uses screening tests and/or diagnostic tests to detect a disease early in its course or address areas of high risk. Often, the earlier a disease is detected, the more likely it can be cured or successfully managed. Managing a disease, especially early in its course, may lessen its impact on your life or prevent or delay serious complications.

Why Shanghai East International Medical Center for Health Screening?

The health screening service at Shanghai East International Medical Center (SEIMC) is an up to date health risk appraisal that emphasizes health education and behavior modification. Drawing on the comprehensive services of SEIMC experts, our health screening is an effective tool for risk identification. We offer state of the art and high quality preventive medicine. Our team of dedicated healthcare professionals and competent staff will provide you with great care, helping you understand your health profile and guiding you to a balanced lifestyle.

At SEIMC we offer health screening packages for:

- women
- men
- children
- adolescents
- domestic helpers
- pre-employment
- pre-school

SEIMC health screening packages have been specifically designed to accommodate the needs of our patients. The health screening checkup includes:

- A comprehensive medical history and physical examination.
- A range of preventive screening tests in different packages for early detection of cancer, heart disease and other serious medical problems.
- A review and update of medications and immunizations, including those needed for international travel.
- A full report of your test results at the conclusion of the examination and a written report.

Considerations When Selecting Health Screening Packages:

This depends on factors such as your age, gender and additional optional items that you can select to be included in the screening. For example:

- Medical History.
- Individual needs.
- Environment both at work and home.
- National schedules of variety from countries.
- SEIMC recommends that people ought to have a health screening once a year.

In some special cases we can adapt our packages for the sake of convenience. If you have previous medical history that dictates certain tests be done, we can incorporate these needs into a package, or alternatively create a tailor made package especially for you. Some of our patients prefer to use the same testing schedule that they would receive in their home countries. In these situations we can obtain such schedules and run a health screening consistent with the testing schedule of any other national standards.

SEIMC Health Screening Process:

1. Appointment

SEIMC health screening services are conducted in an organized manner within a schedule time frame so as to be as convenient as possible. Please phone (86 21) 5879-9999 for an appointment.

2. First Session

The first session of your health screening is usually scheduled at 8:30am on a weekday. All the diagnostic investigations listed on your chosen package will be conducted. It takes about 2.5 to 4 hours depending on the choice of packages. A light breakfast will be provided after the tests.

3. Second Session

The second session is scheduled about 10 days after the first session, when the test results are ready. You will spend 30 minutes to 1 hour with your health screening doctor who examines you physically, reviews the test results of your diagnostic investigations, discusses any other health concerns you may have and offers brief lifestyle counseling.

4. Health Screening Report

A formal health screening report will be sent to you shortly after the second session. You may also choose to pick up the report from our clinic.

Kindly Note: 温馨提示:

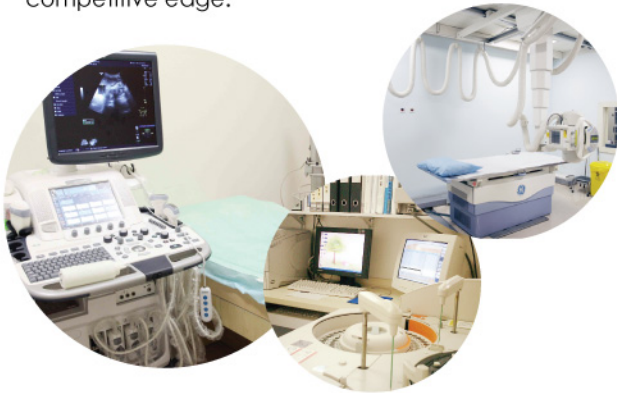

- Please phone (86 21) 5879-9999 for an appointment.
- An overnight fast is necessary i.e. no food or drink after 10pm the night before. You may have some plain water on the morning of your appointment. If you have regular medication, continue to take this at the usual time. A light breakfast will be served on completion of your tests.
- Bring along your past medical reports (from up to 3 years) while reviewing your test results with the doctor.
- Stool collection. Please collect about 1 1/2 teaspoons of stool and place in a small clean container. Ideally we ask that you collect your stool on the morning of your appointment. A container may be obtained from our outpatient clinic.
- Ladies are advised to schedule their health screening 1 week after the last day of menstruation.
- Further diagnostic tests are advised if the results are abnormal.
- 请拨打 (86 21) 5879 9999 预约。
- 请在体检前一天晚上10点后禁食。在体检当天早晨，您可以喝纯净水。如果您有常用药，请继续准时服药。在体检后本院将提供一份早餐。
- 在您与医生做体检报告分析时，请携带往年的体检报告（三年内），以便医生分析比较。
- 请采集一茶匙半的大便样本放置在一个小而干净的容器里。你可以在体检的前一天，或是体检当天早晨采集大便样本。容器可向门诊部前台或护士索取。
- 女性体检请预约在月经后一星期进行。
- 如果体检结果异常，建议您做进一步的检查。

Corporate Health

Regardless of your particular industry sector, corporate health screening is a tool that helps improve health care costs of a company. The absence of key employees due to ill health can be a drain on your resources and expensive in opportunity cost. The health of your employees can be directly linked to their performance at work. As a responsible and caring employer, you will already be aware that the well-being of your staff is important for the successful operation of the company. In addition, our research shows that this is a highly valued employee benefit that improves retention.

Many of Shanghai's top companies require regular SEIMC checkups. For them, an investment in good health is more than a wise business decision, it's a competitive edge.

Benefits of Corporate Health Screening at SEIMC

Consultations and screenings are easily tailored with corporate considerations in mind. Implementing an annual health check brings many benefits:

- Provides your employees with invaluable information about the status of their health.
- Gives you an understanding of your company's exposure to future health risks.
- Allows you to be proactive in encouraging preventative action.

Corporate Proposal

At SEIMC corporate health screenings are completely tailored to your company and your budget. We supply a variety of health screens from a simple basic check to a comprehensive platinum and can mix and match according to your requirements.

Ordering a health screen for your employees could not be easier:

- Tailored - we work with you to provide exactly what you need with attractive pricing.
- Convenient - we provide a one stop comprehensive medical service.
- Prompt - we provide a short physical examination which means less time away from desks.

Corporate Fee

To get a health screening quotation for your company, please contact us so that we may tailor a competitive package both in terms of price and tests. One of our healthcare consultants will advise you on all aspects of arranging and managing a screening program.

Once you have decided on what level of health checks you want to offer your staff, you can leave the rest to us. Email: marketing@seimc.com.cn or phone (86 21) 5879 9999 - and ask for the marketing department.
